

## CURRENT VACANCY

### PLANNER/ PLANNING MANAGER

SRC Infrastructure has been providing project management and engineering-based advisory, consultancy and managed services solutions to UK infrastructure clients for almost 20 years. We are a small to medium sized company that has built a strong reputation delivering multi-disciplinary projects and programmes for private and public sector clients. We carry out multi-disciplinary design packages and support clients with turnkey domain expertise in their teams.

We are currently looking for a **Project Planner/ Planning Manager** to join our collaborative and dynamic team and contribute to achieve year on year growth.

Job type:

Full time – permanent or contract (outside IR35)

Remuneration:

Basic Salary: £35-50k (depending on experience)

Location:

London – flexible to travel between SRC Office (Canary Wharf) and various client offices

Job Summary

Day-to-day you will be responsible for supporting the Project Management team by providing direction, leadership, guidance and management of the embedded planning resources within TfL teams. You will be working closely and directly with external/client staff, key stakeholders and the internal SRC team. You will assist with providing and reporting budget loaded work programmes/schedules for the purpose of coordinating works with Contractors and other third parties.

- Produce budget loaded work programmes and schedules
- Create and update programme data in compliance with client requirements
- Provide analysis and assist in the interpretation of reports produced by the client organisation
- Liaise with the planning team of varying seniority on planning issues to provide solutions for all parties
- Analyse data from programme controls to create summary programme reports for Senior Managers
- Assess contractual schedules and compensation events
- Assess the need for change to planning processes and methods and implement changes to deliver improved performance
- Build critical path schedules from knowledge and first principles, interviewing and leading workshops with project resources

Essential Criteria:

- Right to work in the UK
- Experience using Primavera, MS Project and extensive knowledge of PPM Systems and Tools
- At least 5+ years of previous professional planning management experience on transportation, water, and/or land development projects is required
- Excellent written and verbal communication skills
- Proven ability to work under pressure within time constraints
- Proven capability to build relationships, be proactive and be part of a variety of teams, including multidisciplinary teams

Desirable Criteria

- Significant experience within the TfL/LUL Environment, including knowledge of the planning, design and construction activities undertaken across a number of TfL project areas (track, signalling, stations, civils or surface projects)
- Good knowledge and understanding of capital projects and programmes with an emphasis on Planning
- Knowledge of different Commercial arrangements, NEC contractual obligations and their impact of project controls management with an emphasis on Planning

Application Process:

If you are interested and would like to be considered for this role, please send your CV and cover letter through to [vacancies@srcinfrastructure.com](mailto:vacancies@srcinfrastructure.com)

We will review your application and be in contact if we feel that you are a suitable candidate.

Please Note:

Successful applicants will be required to undertake a Disclosure and Barring Service (DBS) check and will be asked to provide proof of identity, Employment/ Education History, Right to Work and Criminal Record. If you are unable to provide these documents, your application may be rejected.
