SRC Infrastructure Environmental Policy

We all have a responsibility to protect the environment from the effects of our activities. SRC Infrastructure takes its responsibilities seriously in this respect and is committed to minimising the impact of its activities on the environment.

To this end, SRC Infrastructure recognises that there are many steps that it can take continuously to improve its environmental performance and thereby reduce or prevent damage to the environment. These steps can also add value to our business and make a positive contribution to the success of the company. In other words, we do not believe that good environmental management and the financial wellbeing of the company are incompatible.

In order to meet this commitment SRC Infrastructure will pursue the following objectives:

- Ensure compliance with all applicable environmental legislation
- Minimise emissions and pollution
- Follow responsible waste management practices
- Minimise consumption of natural resources
- Minimise noise and other nuisances
- Assist in the management of ecology
- Continuously assess environmental performance

The necessary personnel and financial resources will be allocated to assist the company in meeting its environmental objectives. In addition, SRC Infrastructure will continue to raise the levels of environmental awareness throughout its workforce and promote this awareness to its customers and suppliers.

Signed

A handwritten signature in black ink, appearing to be 'V. Vernikos', written over a horizontal line.
